MEMORANDUM FOR: Deputy Director for Administration

FROM:

[redacted]  
Director of Security

SUBJECT: Polygraph Research Five-Year Plan [redacted]

REFERENCE: Memo for DDA and DDS&T dtd 10 June 88, Same  
Subject, OS 88-0564

25X1

1. As you requested, a review of the total funding package has been conducted in coordination with the Office of Research and Development (ORD). The total cost of this program for the entire five years is [redacted] ORD has budgeted [redacted] of the [redacted] they indicate is needed. OS has budgeted for the entire [redacted] cost of our portion of the program in our FY 1988-92 Program Plan. [redacted]

2. It should be noted that while OS supports ORD program goals, if ORD is unsuccessful in getting their funding profile increased, it will not affect the OS portion of the Plan. The Modern Polygraph Workstation is based on existing technology and is not dependent on extensive research and developmental efforts. While the overall plan may appear to be somewhat ambitious, given the current budget climate, it is essential that we modernize the polygraph program and improve what has evolved into an invaluable operational and security "tool." [redacted]

3. As far as the question concerning a common Intelligence Community Polygraph Research Program is concerned, we are currently sharing all polygraph research information with the other Intelligence Community polygraph users through a quarterly meeting hosted by the Director of Research, Defense Polygraph Institute. We also hold ad hoc meetings with NSA, FBI, and U.S. Secret Service representatives whenever new information is developed. [redacted]
